

DIGITAL SOLUTIONS

DigiCollect understands that digitally reinventing the business processes, business models and platforms to implement enterprise solutions are key drivers for digital transformation of the business.

We help companies gain a strategic advantage through enabling digital with the core business functions and implementing agile solutions as key drivers for digital transformation.

'Companies that master digital business generate 9 percent more revenue, create 26 percent more profit, and have 12 percent higher market valuations than their less digitally savvy competitors.'

George westerman, didier bonnet, andre mcafee (2014) leading digital. Cambridge: Harvard business review

DigiCollect technologies and platforms are build on the foundational premise of the digital transformation and has helped clients in construction, manufacturing, supply chain, infrastructure development and financial services master the digital business by providing a truly agile enterprise solution that transformed how they approach information management, communication, performance measurements and employee utilization.

KEY DRIVERS FOR DIGITAL

Present and future shifts and changes in the industry leads to the necessity of a faster deployment of a digital transformation strategy which can be induced by several causes, often at the same time, on the levels of customer behavior and expectations, new economic realities, societal shifts (e.g. aging populations), ecosystem/industry disruption and (the accelerating adoption and innovation regarding) emerging or existing digital technologies. In practice, end-to-end customer experience optimization, operational flexibility and innovation, are key drivers of digital transformation, along with the development of new revenue sources and information-powered ecosystems of value, leading to business model transformations

- 
- Business Process / Models Re-engineering
 - Technology and Automation
 - Increase Sales Channels and Customer Engagements
 - Employee utilization
 - Relentless pressure to reduce costs
 - Increase visibility into Revenues
 - Easy to scale and digital innovations
 - Centralize and standardize operations
 - Lack of data to justify decisions
 - Preserving the longevity of the organization
